

IData Mat

IData Mat with *Sencorable Technology* will detect the presence, movement, and direction of people in real time. Our process preserves customer anonymity and costs a fraction of previous methods. Our accuracy is unmatched & the sensors can determine not only that someone is in the room, but whether they are sitting or standing, whether they are a child or an adult, and whether they are lying down or may have fallen. They can track your movements because footprints are as unique as fingerprints.

Specifications:

Graphic Method	Inlaid and Laminated
Manufacturing Process	Textile
Face Weight	Varies with Top Base Material
Face Fiber	Varies with Top Base Material
Weight per sq. ft.	Varies with Top Base Material
Water Permeability	Optional
Durability	Extreme UHMW Polymer w/ Carbon Additive
Backing	Performance-Plus Non-Skid Rubber
Edging	1 ½" w x 7/16"h - ADA Compliant
iData Raw Profile	1/32" or .08mm
API	Yes
Warranty	5 years Limited
Size	Unlimited Free lay – Mats can be Sequentially-linked
Data Plan	Monthly No Contract
Data Collection	Wireless Cloud Base Real Time Microsoft Azure
Recyclable	Yes -- 100% (Certifiably Green loop)
LEED	SCS Certified Gold/Platinum options
Power	5 volt Mini USB
